

STACKING RACK

The Go Fast Stacking Rack has a compact design makes perfectly stacked boards every time and allows for banding when the bundle is complete. These racks are made of solid steel, have large greaseable hinges, and are built to last forever.

NO MAINTENANCE: Besides greasing the hinges and optional casters, there is nothing to wear out. You can expect these stacking racks to last a lifetime!

COMPACT: Do you have a lot of extra space inside your operation for huge stacking racks? Neither do we! That is why we developed our compact stacking racks. The hinged door makes it quick and easy to band the bundle and pull it out with a fork truck.
